Subject Index

R = Commission Report; Asterisk (*) = Nomenclature Report (Recommendations 1994)

000–000 = inclusive page numbers of symposium/conference

ACID RAIN
Recommendations for the electrometric determination of the pH of atmospheric wet deposition (acid rain) 649R
ADENOSINE TRIPHOSPHATE
Studies of enthalphy balance and adenosine triphosphate turnover in cultured animal cells 479
AFRAMODIAL DITERPENOIDS
Aframodial and other bioactive diterpenoids from *Aframomum* species 2327
AGGLUTININ
Thermodynamics of lectin-sugar interaction: Binding of sugars to winged bean (*Psophocarpus tetragonolobus*) basic agglutinin (WBAI) 497
AGGREGATION
New concepts for studying and understanding the aggregation, co-aggregation, de-aggregation and self-coiling of organic molecules. Why are cholesterols and triglycerides culprits of arteriosclerosis 1621
ALBUMIN
Standardised method for the estimation of β_2-microglobulin, retinol-binding protein and albumin in urine 915R
ALGAE
New natural products from terrestrial medicinal plants and marine algae 2311
ALKALOIDS
The formation of benzophenanthridine alkaloids 2023
Enantioselective synthesis of alkaloids and carbohydrates via chemoenzymatic methods 2067
A new synthetic approach to dendrobatid alkaloids 2079
Total syntheses of strychnos alkaloids 2095
Diastereo- and entioselective alkaloid syntheses 2127
Biomimetic chemical transformation from simple indole alkaloids in *Gelsemium* alkaloids 2139
Alkaloids from plants of Madagascar in the treatment of drug-resistant *Plasmodium* malaria 2291
ALKAN-1-OL
Vapour-liquid equilibria in alkan-1-ol + *n*-alkane mixtures 553R
ALKYLIDENE
Recent advances in the chemistry and applications of high oxidation state alkylidene complexes 1447
Construction of α-alkylidene-γ-butyrolactones from acyclic ester precursors 1501
ALKYLURACILS
Thermochemistry of alkylated uracils in aqueous solutions. Enthalpies of hydration of 3-alkyluracils 503
ALLOSTERIC
Thermodynamic and electrochemical aspects of the interactions of functionalised calix(4)-arenes and metal cations in 'allosteric media' 435
ALLYLBORANES
Reductive mono- and *trans*-α,α'-diallylation of aromatic nitrogen heterocycles by allylboranes 235
AMIDE HYDROGEN EXCHANGE
Amide hydrogen exchange and mass spectrometry: a probe of high-order structure in proteins 89
AMINO ACIDS
Thermodynamics of denaturation of ribonuclease A in aqueous amino acid solutions 473
Pyridoxalenzymes acting on D-amino acids 709
Concise enantiospecific syntheses of α-hydroxy-β-amino acids and indolizidines of natural origin 2075
ANALYTE
Analyte isolation by solid phase extraction (SPE) on silica-bonded phases: Classification and recommended practices 277R
ANALYTICAL METHODS
Classification and definition of analytical methods based on flowing media 2493R*
Factors important in the selection and description of liquid–liquid extraction procedures used in inorganic analytical chemistry 2501R
ANION-COMPLEXATION
Host–guest chemistry of anion-complexation by macrocyclic multidentate Lewis acids 245
ANTHERIDIC ACID
Synthetic studies on phenazine antibiotics and antheridic acid 2083
ANTHRACYCLINES
Synthesis of new antitumour anthracyclines: Derivatives bearing a fluorine substitution at position 8 or 10 2319
ANTHRAQUINONES
Anthraquinones and chemotaxonomy of the asphodelaceae 2395
ANTI-HIV
HIV-transmembrane glycoprotein GP41 ENV fragments with high antigenicity and their application to determine HIV-positive sera 101
Recent studies on cytotoxic, anti-HIV and antimalarial agents from plants 2283
ANTIBIOTICS
Synthetic studies on phenazine antibiotics and antheridic acid 2083
Total synthesis of aryl *C*-glycoside antibiotics 2175
ANTIBODIES
Catalytic antibodies and enzyme inhibitors 703
ANTICANCER
The chemoprevention of cancer by dietary carotenoids: Studies in mouse and human cells 1025
Mechanism-based isolation and structures of some anticancer active natural products 2219
Marine animal and terrestrial plant anticancer constituents 2271
Formation of reactive intermediates by cytochrome P-450 mediated oxidation of the anticancer drug mitoxantrone 2415
ANTICOAGULANT
Anticoagulant activities of β-1,3-glucanosulfates in dependence on their molecular weight 2403
ANTIDEPRESSANT
Discovery of potential antidepressant agents: Novel 3-arylpyrrolidines with dual mechanism of action on neurotransmission 2201
ANTIFERTILITY
Antifertility principles from *Marsdenia tinctoria*: Pharmacological and phytochemical studies 2343
ANTIFUNGAL
Search for new antifungal compounds from higher plants 2231
ANTIGENS
Design and development of synthetic peptide antigens 2015
ANTIMALARIAL
Recent studies on cytotoxic, anti-HIV and antimalarial agents from plants 2283
ANTIMICROBIAL
Synthesis of macrocyclic lactam/lactone derivatives having antimicrobial activity 2063
ANTITUMOUR
Synthesis of new antitumour anthracyclines: Derivatives bearing a fluorine substitution at position 8 or 10 2319
APOPROTEIN
Molecular recognition in neocarzinostatin complex: how does the apoprotein bind specifically and stabilise the chromophore? 791
ARENETHIOLATES
Asymmetric catalysis with chiral organo-copper–copper arenethiolates 1455
ARSENICAL
Multiple ionizations in proteins: Arsenical analogues of natural phosphates 2399
ARTERIOSCLEROSIS
New concepts for studying and understanding the aggregation, co-aggregation, de-aggregation and self-coiling of organic molecules. Why are cholesterols and tri-glycerides culprits of arteriosclerosis? 1621
ARYLPYRROLIDINES
Discovery of potential antidepressant agents: Novel 3-arylpyrrolidines with dual mechanism of action on neurotransmission 2201
ASIAN MEDICINAL PLANTS
Constituents of some Asian medicinal plants 2375

ASPERGILLUS NIGER
Interaction of *Aspergillus niger* with sodium *N*-dodecyl sulphate 71
ASPHODELACEAE
Anthraquinones and chemotaxonomy of the asphodelaceae 2395
ASYMMETRIC
Recent advances in the boron route to asymmetric synthesis 201
Asymmetric catalysis with chiral organo-copper–copper arenethiolates1455
Enantioselective synthesis via sparteine-induced asymmetric deprotonation 1479
Asymmetric synthesis mediated by chiral ligands 1487
Electronic effects in asymmetric catalysis: Enantioselective carbon–carbon bond forming process 1535
A practical asymmetric synthesis LTD4 antagonist 1551
Asymmetric syntheses and lanthanide-induced DC studies of (24R and 24S) 5β-cholestane-3α,7α,12α,24,25-pentols 2037
Asymmetric synthesis of natural products monitored by chiral sulfoxides 2159
ATOMIC ABSORPTION
Measurement of total nickel in body fluids: Electrothermal atomic absorption methods and sources of preanalytic variation 357R
ATOMIC WEIGHTS
Atomic Weights of the elements 1993 2423R
ATROPISOMER-SELECTIVE
Atropisomer-selective 1,1-binaphthyl synthesis via chirality transfer from sulfur 2143
AUTOMATION
Recommendations for nomenclature in laboratory robotics and automation 609R
AZA-CLAISEN REARRANGEMENT
Application of the aza-Claisen rearrangement to the total synthesis of natural products: (–)-Isoiridomyrmecin 2071
AZA-CLOSO-DODECABORANE
Aza-closo-dodecaborane(12): The story of six-coordinate nitrogen 255
AZABICYCLO [3.2.1] OCTENE
Azabicyclo[3.2.1]octene derivatives obtained by rearrangement reactions in course of the catharanthine synthesis 2179
AZADIRACHTIN
Synthesis and chemistry of the insect anti-feedant azadirachtin 2099

BENZENE
Thermodynamics of binary mixtures of alkylbenzenes: Role of orientational order in benzene + alkylbenzene mixtures 399
BENZOFURAN
A palladium catalyzed route to a benzofuran analogue of idolactam V (ILV): Effects on PKC isotype selectivity 2087
BENZOIC ACIDS
Compilation and critical evaluation of structure-reactivity parameters and equations—Part 1: Values of σ_m and σ_p based on the ionization of substituted benzoic acids in water at 25°C 2451R
BENZOPHENANTHRIDINE
The formation of benzophenanthridine alkaloids 2023
BINAPHTHYL
Atropisomer-selective 1,1-binaphthyl synthesis via chirality transfer from sulfur 2143
BINDING PHENOMENA
Functional roles of natural products: The involvement of extended arrays of weak interactions in cooperative binding phenomena 1975
BIOACTIVE
Bioactive substances isolated from marine sponge, a miniature conglomerate of various organisms 819
Bioactive metabolites from marine invertebrates 2223
Bioactive compounds from marine sponges 2227
Bioactive phenolic compounds in traditional medicines 2263
Bioactive components from *Ficus glomerata* 2287
Recent results in the search for bioactive compounds from Turkish medicinal plants 2295
Aframodial and other bioactive diterpenoids from *Aframomum* species 2327
BIOANALYTICAL NOMENCLATURE
Glossary of bioanalytical nomeclature—Part 1: General terminology, body fluids, enzymology, immunology 2587R*
BIOCHEMICAL
Biochemical engineering in biotechnology 117R
BIODEGRADATION
Structure-activity relationships for biodegradation: A critical review 1931R
BIOLOGICAL/BIOLOGICALLY
Thermodynamics of aqueous solutions (Inaugural address) 373
A system of microcalorimeters 375
A thermodynamic framework for solutions based on the osmotic equilibrium concept—1: General formulation 383
Partial molar heat capacities volumes and compressibilities of aqueous solutions of some peptides that model side-chains of proteins 387
Steric effect on solvation and complexation of metal ions in solution 393
Thermodynamics of binary mixtures of alkyl-benzenes: role of orientational order in benzene + alkylbenzene mixtures 399
Some recent developments in the statistical mechanical theory of ionic solvation 405
Transfer entropies and structuredness of solvents 411
Volume changes in complex formation between crown ethers of cryptand-222 and alkali metals in various solvents 419
Interactions in solutions: The interplay between solute solvation and solute-solute interactions 429
Thermodynamic and electrochemical aspects of the interactions of functionalised calix(4)-arenes and metal cations in 'allosteric media' 435
Thermodynamics of eutectic mixtures. Addition compounds and associated mixtures 441
Topological aspects of molecular interactions in liquid mixtures of non-electrolytes 449
Salt-water oscillator and its non-electrolyte analogues 455
Thermodynamics of polysaccharide polyelectrolytes: Enthalpy changes in the conformational transition of κ-carrageenan 461
Temperature and guanidine induced unfolding of dodecameric glutamine synthetase from *E. coli* 469
Thermodynamics of denaturation of ribonuclease A in aqueous amino acid solutions 473
Studies of enthalpy balance and adenosine triphosphate turnover in cultured animal cells 479
Life in the pressure cooker: The thermal unfolding of proteins from hyperthermophiles 485
Protein adsorption at solid surfaces: A thermodynamic approach 491
Thermodynamics of lectin–sugar interaction: Binding of sugars to winged bean (*Psopho-carpus tetragonolobus)* basic agglutinin (WBAI) 497
Thermochemistry of alkylated uracils in aqueous solutions. Enthalpies of hydrations of 3-alkyluracils 503
Physicochemical studies of microemulsions 513
Hydrophobic interactions and small-angle neutron scattering in aqueous solutions 515
Thermodynamics of clustering of droplets in water/AOT/heptane microemulsion 521
Interactions between surfactants and uncharged polymers in aqueous solution studied by microcalorimetry 527
Models of biological systems and biological processes 759
Applications of IUPAC–IFCC recommendations on quantities and units to WHO biological reference materials for diagnostic use 909R
Enzymatic synthesis of analogs of bacterial lipid A and design of biologically active LPS-antagonists and -mimetics 2171
Biomimetic chemical transformation from simple indole alkaloids to *Gelsemium* alkaloids 2193
Biologically active constituents of tropical and subtropical plants 2347
BIOLUMINESCENCE
Bioluminescence mechanism on new systems 765
BIOMIMETIC
Biomimetic oxygenations catalyzed by metalloporphyrins and metalloporphinoids bearing co-catalytic functions 1519,
Biomimetic chemistry 1573
Biomimetic chemical transformation from simple indole alkaloids to Gelsemium alkaloids 2139
Biomimetic synthesis of nazlinin and nitrarine 2239
BIOORGANIC
Bioorganic chemistry—a scientific endeavour in continuous transition 659
Rational design of sequence-specific DNA ligands for artificial control of gene expression 663
Bioorganic studies of transmitter receptors with philanthotoxin analogs 671
Molecular recognition by artificial receptors 679
Simple but efficient models for nuclease catalysis 687
Catalytic and regulatory strategies of themophilic lactate dehydrogenase: microscopic rate constants from kinetic isotope effects 695
Catalytic antibodies and enzyme inhibitors 703
Pyridoxal enzymes acting on D-amino acids 709
Darwinian evolution of *Trimeresurus flavoviridis* venom gland phospholipase A_2 isozymes 715

A new type of carboxypeptidase A inhibitor: design, synthesis, and mechanistic implication 721
Cytochromes P-450 and model systems: great diversity of catalyzed reactions 737
Enantioselective conversions by bacterial quinoprotein alcohol dehydrogenases 745
Modeling of quinoprotein functions 753
Models of biological systems and biological processes 759
Bioluminescence mechanism on new systems 765
Recognition and transport of natural and synthetic siderophores by microbes 773
Spider neurotoxins and their neuronal receptors 783
Molecular recognition in neocarzinostatin complex: how does the apoprotein bind specifically and stabilize the chromophore? 791
Intermolecular interaction between multifunctional porphyrin and ubiquinone analogues 797
Towards synthetic enzymes based on porphyrins and steroids 803
New trends of marine biotechnology development 811
Bioactive substances isolated from marine sponge, a miniature conglomerate of various organisms 819
Synthetic gene transfer vectors 827
Design, synthesis, and evaluation of DNA minor groove binding agents: the duocarmycins 837
Interactions between expanded porphyrins and nucleic acids 845
Dynamics of lipids in synthetic membranes 851
Binuclear macrocyclic and macrobicyclic complexes for dioxygen activation and transport 859
A chemical approach towards photosynthetic reaction center (2) 867

BIOSYNTHESIS/BIOSYNTHETIC
Biosynthetic studies on taxol 2045
Second generation leukotriene biosynthesis inhibitors 2197
The biosynthesis of pyoverdins 2207
Microbial metabolites affecting lipid biosynthesis 2267
Biosynthesis of the pigments of life. The mystery of the cyclisation and ring D-inversion in the formation of uroporphyrinogen III 2303
Biosynthesis of lactacystin, a novel microbial metabolite which induces differentiation of Neuro 2a cells, a mouse neuroblastoma cell line 2411

BIOTECHNOLOGY
Biochemical engineering in biotechnology 117R
New trends of marine biotechnology development 811
Biotechnology and synthetic chemistry: Routes to clinically important natural products 2243
Plant cell biotechnology for the production of secondary metabolites 2307

BODY FLUIDS
Measurement of total nickel in body fluids: Electrothermal atomic absorption methods and sources of preanalytic variation 357R
Glossary of bioanalytical nomenclature—Part 1: General terminology, body fluids, enzymology, immunology 2587R*

BORANE
Aza-closo-dodecaborane(12): The story of six-coordinate nitrogen 255
Borane–osmium cluster chemistry 263

BORON
Recent advances in the boron route to asymmetric synthesis 201
New synthetic transformations via organoboron compounds 213
Some chemistry of hindered organoboranes 223
Reductive mono- and *trans*-α,α′-diallylation of aromatic nitrogen heterocycles by allylboranes 235
Host-guest chemistry of anion-complexation by macrocyclic multidentate Lewis acids 245
Aza-closo-dodecaborane(12): The story of six-coordinate nitrogen 255
Borane–osmium cluster chemistry 263

C-ARYL GLYCOSIDE
Novel methods for the synthesis of *C*-aryl glycoside natural products 2135

C-GLYCOSIDE ANTIBIOTICS
Total synthesis of aryl *C*-glycoside antibiotics 2175

C-GLYCOSYL COMPOUNDS
Synthesis of C-glycosyl compounds and other natural products from levoglucosenone 2189

C_{60}
The structure and reactivity of C_{60} 2091

CALIX(4)ARENES
Thermodynamic and electrochemical aspects of the interactions of functionalised calix(4)-arenes and metal cations in 'allosteric media' 435

CANCER
The chemoprevention of cancer by dietary carotenoids: Studies in mouse and human cells 1025
Mechanism-based isolation and structures of some anticancer active natural products 2219
Marine animal and terrestrial plant anticancer constituents 2271
Formation of reactive intermediates by cytochrome P-450 mediated oxidation of the anticancer drug mitoxantrone 2415

CARBOHYDRATES
Enantioselective synthesis of alkaloids and carbohydrates via chemoenzymatic methods 2067
Role of cell surface carbohydrates in malaria 2259

CARBON
Reporting of stable hydrogen, carbon, and oxygen isotopic abundances 273R
Application of intramolecular Heck reactions for forming congested quaternary carbon centers in complex molecule total synthesis 1423

CARBON–CARBON BOND
Electronic effects in asymmetric catalysis: Enantioselective carbon–carbon bond forming processes 1535

CARBOXYPEPTIDASE
A new type of carboxypeptidase A inhibitor: design, synthesis, and mechanistic implication 721

CAROTENE/CAROTENOIDS
Reflections on carotenoid synthesis 931
Recent progress in carotenoid and retinoid synthesis 939
HPLC and SFC of carotenoids: Scope and limitations 947
Conventional and specially designed carotenoids: Synthesis, optical properties and conductivity 955
Synthesis of isotopically labelled carotenoids: Investigations on structure and function of carotenoproteins at the atomic level 963
Carotenoproteins: Advances in structure determination 973
Rhodopsins containing 6- to 9-membered rings. The triggering process of visual transduction 981
Isomerization reactions of retinoids in the visual system 989
Retinoids in oncology: Experimental and clinical aspects 995
The biological properties of carotenoids 1003
Absorption, transport and metabolism of carotenoids in humans 1011
Recent advances in clinical research involving carotenoids 1017
The chemoprevention of cancer by dietary carotenoids: Studies in mouse and human cells 1025
Carotenoids: Nature's unique pigments for light and energy processing 1033
Carotenoids as accessory light-harvesting pigments 1041
Biochemical aspects of carotene desaturation and cyclization in chromoplast membranes from *Narcissus pseudonarcissus* 1047
Production of carotenoids by recombinant DNA technology 1057
Regulation of carotenoid biosynthesis genes during plant development 1063
Developments in world aquaculture, feed formulations and role of carotenoids 1069
C_{45}- and C_{50}-carotenoids 2369

CAROTENOPROTEINS
Synthesis of isotopically labelled carotenoids: Investigations on structure and function of carotenoproteins at the atomic level 963
Carotenoproteins: Advances in structure determination 973

CATALYSIS/CATALYTIC
Simple but efficient models for nuclease catalysis 687
Catalytic and regulatory strategies of themophilic lactate dehydrogenase: microscopic rate constants from kinetic isotope effects 695
Catalytic antibodies and enzyme inhibitors 703
Asymmetric catalysis with chiral organo-copper–copper arenethiolates 1455
Catalytic C–H/olefin coupling 1527
Electronic effects in asymmetric catalysis: Enantioselective carbon–carbon bond forming processes 1535
Novel Lewis acid catalysis in organic synthesis 1557
Catalysis—where science and industry meet 1597
Enhanced synthetic efficiency towards natural products via transition metal catalyzed reactions 2007
Natural products by enantioselective catalysis with transition metal compounds 2033

CATENANES
Transition metals as assembling and templating species: From catenanes and knots to strings threaded through molecular rings 1543

CATHARANTHENE
Azabicyclo[3.2.1]octene derivatives obtained by rearrangement reactions in course of the catharanthine synthesis 2179

CD SPECTRAL STUDIES
Asymmetric syntheses and lanthanide-induced CD studies of (24R and 24S) 5β-cholestane-3α, 7α, 12α, 24, 25-pentols 2037
Synthesis and CD spectral studies of some fused cholestenopyrimidines 2057

CELLS
Studies of enthalpy balance and adenosine triphosphate turnover in cultured animal cells 479
Impedances of electrochemical systems: Terminology, nomenclature and representation—Part 1: Cells with metal electrodes and liquid solutions 1831R*
Role of cell surface carbohydrates in malaria 2259
CENTRIFUGATION
Quantities and units for electrophoresis in the clinical laboratory 897R*
CERAMICS
Tailored microstructures of silicon nitride ceramics 1807
CHARACTERIZATION
Thin films including layers: terminology in relation to their preparation and characterization 1667R*
Recommendations for the characterization of porous solids 1739R
CHEMICAL ANALYSIS
Nomenclature for the presentation of results of chemical analysis 595R*
Nomenclature of thermometric and enthalpimetric methods in chemical analysis 2487R*
CHEMICAL VAPOUR DEPOSITION
Plasma and surface diagnostics in PECVD (plasma-enhanced chemical vapor deposition) from silicon containing organic monomers 1373
High-temperature chemistry of CVD (chemical vapor deposition) diamond growth 1773
CHEMOENZYMATIC
Enantioselective synthesis of alkaloids and carbohydrates via chemoenzymatic methods 2067
CHEMOPREVENTION
The chemoprevention of cancer by dietary carotenoids: Studies in mouse and human cells 1025
CHEMOTAXONOMY
Anthraquinones and chemotaxonomy of the asphodelaceae 2395
CHIRAL/CHIRALITY
Controlling stereochemistry in C–C and C–H bond formation with electronically asymmetric organometallics and chiral poisons 1463
Asymmetric synthesis mediated by chiral ligands 1487
Atropisomer-selective 1,1-binaphthyl synthesis via chirality transfer from sulfur 2143
Asymmetric synthesis of natural products monitored by chiral sulfoxides 2159
CHLOROGLYCINE
Application of α-chloroglycine residues for the modification of oligopeptides 2167
CHOLECYSTOKININ PEPTIDES
Synthesis, conformational and biological properties of lipophilic derivatives of gastrin and cholecystokinin peptides 2111
CHOLESTANE-PENTOLS
Asymmetric syntheses and lanthanide-induced CD studies of (24R and 24S) 5β-cholestane-3α,7α,12α,24,25-pentols 2037
CHOLESTENOPYRIMIDINES
Synthesis and CD spectral studies of some fused cholestenopyrimidines 2057
CHOLESTEROLS
New concepts for studying and understanding the aggregation, co-aggregation, de-aggregation and self-coiling of organic molecules. Why are cholesterols and triglycerides culprits of arteriosclerosis? 1621
CHROMATOGRAPHY
Analytical techniques for trace organic compounds—VI. Application of liquid chromatography-mass spectrometry 1913R
CHROMOPHORE
Molecular recognition in neocarzinostatin complex: how does the apoprotein bind specifically and stabilize the chromophore? 791
CHROMOPLAST
Biochemical aspects of carotene desaturation and cyclization in chromoplast membranes from *Narcissus pseudonarcissus* 1047
CHRONIC FATIGUE SYNDROME
Di-2-ethylhexyl phthalate: A medical concern and a possible marker for chronic fatigue syndrome 2103
CLINICAL/CLINICALLY
Quantities and units for electrophoresis in the clinical laboratory 891R*
Quantities and units for centrifugation in the clinical laboratory 897R*
Retinoids in oncology: Experimental and clinical aspects 995
Recent advances in clinical research involving carotenoids 1017
Biotechnology and synthetic chemistry: Routes to clinically important natural products 2243
CLUSTER
Borane–osmium cluster chemistry 263
COMPOSITE SYNTHESIS
Application of thermodynamics, phase equilibria and kinetics to *in situ* composite synthesis via ternary solid-state displacement reactions 1797
COMPRESSIBILITIES
Partial molar heat capacities volumes and compressibilities of aqueous solutions of some peptides that model side-chains of proteins 387
COMPUTER-AIDED
Computer-aided drug design 1589
CONFORMATIONAL
Conformational equilibrium of dihydronicotin amide in LDH–NADH* 83
CROWN ETHERS
Volume changes in complex formation between crown ethers of cryptand-222 and alkali metals in various solvents 419
CRYSTALLINS
Post translational modification of crystallins isolated from human lenses 95
CYCLOADDITION
Higher-order cycloaddition reactions in natural product synthesis 2029
The tandem cycloaddition chemistry of nitroalkenes 2041
CYCLOHEXENONE/PENTENONE
Enantiocontrolled route to natural products using chiral equivalents of cyclopentenone and cyclohexenone 2119
CYTOCHROME P-450
New developments in cytochrome P-450 modeling 729
Cytochromes P-450 and model systems: great diversity of catalyzed reactions 737
Formation of reactive intermediates by cytochrome P-450 mediated oxidation of the anticancer drug mitoxantrone 2415
CYTOTOXIC/CYTOTOXICITY
Synthesis and cytotoicity of natural (+)-duocarmycin A and its three possible stereo-isomers 2255
Recent studies on cytotoxic, anti-HIV and antimalarial agents from plants 2283
Cytotoxic lignans from *Haplophyllum* species 2379
Chemistry of the cytotoxic principles of the marine fungus *Lignincola laevis* 2391

DARWINIAN
Darwinian evolution of *Trimeresurus flavoviridis* venom gland phospholipase A_2 isozymes 715
DEHYDROGENASE
Catalytic and regulatory strategies of themophilic lactate dehydrogenase: microscopic rate constants from kinetic isotope effects 695
DENDROBATID ALKALOIDS
A new synthetic approach to dendrobatid alkaloids 2079
DEPOSITION
Mass and optical emission spectroscopy of plasmas for diamond synthesis 1195
DI-2-ETHYLHEXYL PHTHALATE
Di-2-ethylhexyl phthalate: A medical concern and a possible marker for chronic fatigue syndrome 2103
DIAGNOSTIC
Applications of IUPAC-IFCC recommendations on quantities and units to WHO biological reference materials for diagnostic use 909R
DIALLYLATION
Reductive mono- and *trans*-α,α′-diallylation of aromatic nitrogen heterocycles by allylboranes 235
DIAMOND
Mass and optical emission spectroscopy of plasmas for diamond synthesis 1195
Plasmaphysical and plasmachemical aspects of diamond deposition in low pressure plasmas 1397
High-temperature chemistry of CVD (chemical vapor deposition) diamond growth 1773
Diamond substrate interactions and the adhesion of diamond coatings 1783
Diamond-like carbon 1789
DIASTEREOSELECTIVE
Diastereo- and enantioselective akaloid syntheses 2127
DIAZOAMIDE A
Synthesis of heterocyclic natural products: Model studies towards diazonamide A 2107
DIELECTRIC
Modelling of dielectric barrier discharge chemistry 1275
DIHYDRONICOTINE AMIDE
Conformational equilibrium of dihydronicotin amide in LDH–NADH 83

DIOXYGEN
Binuclear macrocyclic and macrobicyclic complexes for dioxygen activation and transport 859
DITERPENOIDS
Aframodial and other bioactive diterpenoids from *Aframomum* species 2327
DNA
Rational design of sequence-specific DNA ligands for artificial control of gene expression 663
Design, synthesis, and evaluation of DNA minor groove binding agents: the duocarmycins 837
Production of carotenoids by recombinant DNA technology 1057
DRIMANE
Recent developments in the synthesis of drimane and lactarane sesquiterpenes 2053
DRUG DESIGN
Computer-aided drug design 1589
DUOCARMYCINS
Design, synthesis, and evaluation of DNA minor groove binding agents: the duocarmycins 837
Synthesis and cytotoxicity of natural (+)-duocarmycin A and its three possible stereoisomers 2255

E. COLI
Temperature and guanidine induced unfolding of dodecameric glutamine synthetase from *E. coli* 469
ELECTRIC CORONA
Theory of electric corona including the role of plasma chemistry 1287
ELECTROCHEMICAL
Thermodynamic and electrochemical aspects of the interactions of functionalised calix(4)-arenes and metal cations in 'allosteric media' 435
Terminology and connections for microelectronic ion-selective field effect transistor devices in electrochemistry 565R*
Impedances of electrochemical systems: terminology, nomenclature and representation—Part I: Cells with metal electrodes and liquid solutions 1831R
Terminology and notations for multistep electrochemical reaction mechanisms 2445R*
ELECTRODES
Mercury(III) oxide and silver(I) oxide electrodes in aqueous solutions 641R
Impedences of electochemical systems: Terminology, nomenclature and representation—Part I: Cells with metal electrodes and liquid solutions 1831R
Recommendations for nomenclature of ion-selective electrodes 2527R
ELECTROMETRIC
Recommendations for the electrometric determination of the pH of atmospheric wet deposition (acid rain) 649R
ELECTRON CYCLOTRON RESONANCE
Electron cyclotron resonance plasma etching of Si with Cl_2: Plasma chemistry and mechanisms 1327
ELECTROPHORESIS
Quantities and units for electrophoresis in the clinical laboratory 891R
ELECTROTHERMAL
Measurement of total nickel in body fluids: Electrothermal atomic absorption methods and sources of preanalytic variation 357R
ELEMENTS
Applications of accelerator mass spectrometry in analysis of trace isotopes and elements 305R
Names and symbols of transfermium elements 2419R*
Atomic Weights of the elements 1993 2423R
ENANTIOSELECTIVE,-CONTROLLED
Enantioselective conversions by bacterial quinoprotein alcohol dehydrogenases 745
Enantioselective synthesis via sparteine-induced asymmetric deprotonation 1479
Electronic effects in asymmetric catalysis: Enantioselective carbon–carbon bond forming processes 1535
Natural products by enantioselective catalysis with transition metal compounds 2033
Enantioselective synthesis of alkaloids and carbohydrates via chemoenzymatic methods 2067
Concise enantiospecific syntheses of α-hydroxy-β-amino acids and indolizidines of natural origin 2075
Enantiocontrolled route to natural products using chiral equivalents of cyclopentenone and cyclohexenone 2119
Diastereo- and enantioselective akaloid syntheses 2127
ENTHALPIES
Thermodynamics of polysaccharide polyelectrolytes: Enthalpy changes in the conformational transition of κ-carrageenan 461
Studies of enthalpy balance and adenosine triphosphate turnover in cultured animal cells 479
Thermochemistry of alkylated uracils in aqueous solutions. Enthalpies of hydration of 3-alkyluracils 503
ENTHALPIMETRIC
Nomenclature of thermometric and enthalpimetric methods in chemical analysis 2487R*
ENTROPIES
Transfer entropies and structuredness of solvents 411
ENZYME/ENZYMATIC
Targeting enzyme sites in pyruvate kinase, glutamate dehydrogenase and glutathione S-transferase 15
Catalytic antibodies and enzyme inhibitors 703
Pyridoxal enzymes acting on D-amino acids 709
Towards synthetic enzymes based on porphyrins and steroids 803
Enzymatic synthesis of analogs of bacterial lipid A and design of biologically active LPS-antagonists and -mimetics 2171
Biorational design of herbicides: Synthesis of inhibitors of the PFP enzyme 2211
Enzyme-mediated regioselective acylation of polyhydroxylated natural products 2215
A transition from ionic to free-radical mechanisms in chemistry and enzymology 2387
ENZYMOLOGY
Glossary of bioanalytical nomeclature—Part 1: General terminology, body fluids, enzymology, immunology 2587R*
EQUILIBRIA
Standard quantities in chemical thermodynamics. Fugacities, activities and equilibrium constants for pure and mixed phases 533R
ERYTHROMYCIN
Erythromycin: New chemistry on an old compound 2365
ETCHING
The chemistry of etching and deposition processes 1185
EUONYMINOL
The chemistry of khat. An approach to the synthesis of euonyminol 2183
EUTECTIC
Thermodynamics of eutectic mixtures. Addition compounds and associated mixtures 441

FICUS GLOMERATA
Bioactive components from *Ficus glomerata* 2287
FLOWING MEDIA
Classification and definition of analytical methods based on flowing media 2493R*
FREE-RADICAL
A transition from ionic to free-radical mechanisms in chemistry and enzymology 2387
FULLERENES
The fullerenes: Precursors for 21st century materials 1389
FUMONISINS
The chemistry of fumonisins and related compounds. Fumonisins from *Fusarium moniliforme:* Chemistry, structure and biosynthesis 2315
FUNGII
Secondary phytotoxic metabolites from pathogenic fungi: Structure, synthesis and activity 2299
FUSARIUM MONILIFORME
The chemistry of fumonisins and related compounds. Fumonisins from *Fusarium moniliforme*: Chemistry, structure and biosynthesis 2315

GANGLIO-GANGLIOSIDE
Experiments directed towards synthesis of complex glycosphingolipids: Ganglioganglioside GQ1b[1] 2123
GARLIC
Chemistry in a salad bowl: Comparative organosulfur chemistry of garlic, onion and shiitake mushrooms 2205
GASTRIN PEPTIDES
Synthesis, conformational and biological properties of lipophilic derivatives of gastrin and cholecystokinin peptides 2111
GELSEMINE
N-acyliminium ion cyclisations in natural product chemistry: Synthesis of gelsemine 2163
GELSEMIUM ALKALOIDS
Biomimetic chemical transformation from simple indole alkaloids to *Gelsemium* 2139
GENE
Rational design of sequence-specific DNA ligands for artificial control of gene expression 663
Synthetic gene transfer vectors 827
GLANDIFLORENIC ACID
Molecular rearrangements in derivatives of grandiflorenic acid [(–)-kaur-9(11), 16-dien-19-oic acid] 2357

GLOSSARY
Glossary of terms used in physical organic chemistry 1077R*
Glossary of bioanalytical nomenclature—Part 1: General terminology, body fluids, enzymology, immunology 2587R*
GLUCANSULFATES
Anticoagulant activities of β-1,3-glucansulfates in dependence on their molecular weight 2403
GLUTAMINE SYNTHETASE
Temperature and guanidine induced unfolding of dodecameric glutamine synthetase from *E. coli* 469
GLYCANS
Structural studies on glycoprotein glycans 2235
GLYCOPROTEIN
HIV-transmembrane glycoprotein GP41 ENV fragments with high antigenicity and their application to determine HIV-positive sera 101
Structural studies on glycoprotein glycans 2235
GLYCOSPHINGOLIPIDS
Experiments directed towards synthesis of complex glycosphinogolipids: Ganglioganglioside GQ1b[1] 2123
GRAPHIC REPRESENTATIONS
Graphic representations (chemical formulae) of macromolecules 2469R*
GRAPHITE
Nomenclature of interlaboratory analytical studies 1893R

HAPLOPHYLLUM
Cytotoxic lignans from *Haplophyllum* species 2379
HEAT CAPACITIES
Partial molar heat capacities volumes and compressibilities of aqueous solutions of some peptides that model side-chains of proteins 387
HAEMOGLOBINS
Structural analysis of proteins in Thailand: Identification of abnormal hemoglobins 105
HERBICIDES
Biorational design of herbicides: Synthesis of inhibitors of the PFP enzyme 2211
HETEROCYCLES
Reductive mono- and *trans*-α,α'-diallylation of aromatic nitrogen heterocycles by allylboranes 235
HIGH TEMPERATURE
Thermochemistry of Perovskite-related oxides with high oxidation states: Superconductors, sensors, fuel cell materials 1759
Chemical approaches to the design of oxide materials 1765
High-temperature chemistry of CVD (chemical vapor deposition) diamond growth 1773
Diamond substrate interactions and the adhesion of diamond coating 1783
Diamond-like carbon 1789
Application of thermodynamics, phase equilibria and kinetics to *in-situ* composite synthesis via ternary solid-state displacement reactions 1797
Tailored microstructures of silicon nitride ceramics 1807
Progress in the chemistry of ternary and quaternary nitrides 1815
Advanced materials for high temperature applications. New ways of elaboration 1823
HIV
HIV-transmembrane glycoprotein GP41 ENV fragments with high antigenicity and their application to determine HIV-positive sera 101
Recent studies on cytotoxic, anti-HIV and antimalarial agents from plants 2283
HOST–GUEST CHEMISTRY
Host–guest chemistry of anion-complexation by macrocyclic multidentate Lewis acids 245
HYDROGEN
Reporting of stable hydrogen, cabron, and oxygen isotopic abundances 273R
HYDROGEN/METAL EXCHANGE
Site selective hydrogen/metal exchange: Competition and cooperation between superbases and neighboring groups 1439
HYDROPHOBIC
Hydrophobic interactions and small-angle neutron scattering in aqueous solutions 515
HYDROXYAMINO ACID
Use of the aryl groups as the carboxyl synthon. Application to the synthesis of some natural product containing hydroxy amino acid functions 2151
HYPERTHERMOPHILES
Life in the pressure cooker: The thermal unfolding of proteins from hyperthermophiles 485

IMMUNOLOGY
Glossary of bioanalytical nomenclature—Part 1: General terminology, body fluids, enzymology, immunology 2587R*
IMPEDANCES
Impedances of electrochemical systems: Terminology, nomenclature and representation—Part I: Cells with metal electrodes and liquid solutions 1831R*
INCINERATED ASH
High power plasma arc melting process for incinerated ash contraction 1295
INDOLACTAM V
A palladium catalyzed route to a benzoxfuran analogue of idolactam V (ILV): Effects on PKC isotype selectivity 2087
INDOLE ALKALOIDS
Biomimetic chemical transformation from simple indole alkaloids to *Gelsemium* alkaloids 2139
INDOLIZIDINES
Concise enantiospecific syntheses of α-hydroxy-β-amino acids and indolizidines of natural origin 2075
INFRARED SPECTROSCOPY
Gas phase infrared spectroscopy in characterization of unsaturated natural products 2323
INSECT ANTIFEEDANT
Synthesis and chemistry of the insect antifeedant azadirachtin 2099
INSECTICIDAL
Some recent isolation studies from potential insecticidal *Piper* species 2339
INTERCALATION
Nomenclature and terminology of graphite intercalation compounds 1893R*
INTERLABORATORY
Nomenclature of interlaboratory analytical studies 1903R*
INTRAMOLECULAR DYNAMICS
The study of intramolecular dynamics by nuclear magnetic resonance 1955
ION-SELECTIVE ELECTRODES
Recommendations for nomenclature of ion-selective electrodes 2527R*
IONIC
Some recent developments in the statistical mechanical theory of ionic solvation 405
A transition from ionic to free-radical mechanisms in chemistry and enzymology 2387
IONIZATIONS
Multiple ionizations in proteins: Arsenical analogues of natural phosphates 2399
Compilation and critical evaluation of structure-reactivity parameters and equations—Part I: Values of σ_m and σ_p based on the ionization of substituted benzoic acids in water at 25°C 2451R
IRIDOIDS
Recent developments in iridoids chemistry 2335
ISOTOPES/ISOTOPIC
Reporting of stable hydrogen, carbon, and oxygen isotopic abundances 273R
Applications of accelerator mass spectrometry in analysis of trace isotopes and elements 305R
Catalytic and regulatory strategies of themophilic lactate dehydrogenase: microscopic rate constants from kinetic isotope effects 695
IUPAC CONGRESS
Biomimetic chemistry 1573
Recent development in NMR methodology for the study of molecular structure and dynamics 1583
Computer-aided drug design 1589
Catalysis—where science and industry meet 1597
New concepts for studying and understanding the aggregation, co-aggregation, de-aggregation and self-coiling of organic molecules. Why are cholesterols and triglycerides culprits of arteriosclerosis? 1621
Material chemistry studies—their role for the development of advances nitride materials 1629

κ-CARRAGEENAN
Thermodynamics of polysaccharide polyelectrolytes: Enthalpy changes in the conformational transition of κ-carrageenan 461
KHAT
The chemistry of khat. An approach to the synthesis of euonyminol 2183
KININOGEN
Structural biology of high molecular weight kininogen 27

LACTACYSTIN
Biosynthesis of lactacystin, a novel microbial metabolite which induces differentiation of Neuro 2a cells, a mouse neuroblastoma cell line 2411
LACTAM/LACTONE DERIVATIVES
Synthesis of macrocyclic lactam/lactone derivatives having antimicrobial activity 2063
LACTARANE
Recent developments in the synthesis of drimane and lactarane sesquiterpenes 2053
LENSES
Post translational modification of crystallins isolated from human lenses 95
Cataractous lens and its environment 111
LEUKOTRIENE
Second generation leukotriene biosynthesis inhibitors 2197
LEWIS ACIDS
Host–guest chemistry of anion-complexation by macrocyclic multidentate Lewis acids 245
Novel Lewis acid catalysis in organic synthesis 1557
LIGNANS
Cytotoxic lignans from *Haplophyllum* species 2379
LIGNINCOLA LAEVIS
Chemistry of the cytotoxic principles of the marine fungus *Lignincola laevis* 2391
LIPIDS
Dynamics of lipids in synthetic membranes 851
Enzymatic synthesis of analogs of bacterial lipid A and design of biologically active LPS-antagonists and -mimetics 2171
Microbial metabolites affecting lipid biosynthesis 2267
LIPOPHILIC
Synthesis, conformational and biological properties of lipophilic derivatives of gastrin and cholecystokinin peptides 2111
LIQUID–LIQUID EXTRACTION
Factors important in the selection and description of liquid–liquid extraction procedures used in inorganic analytical chemistry 2501R
LONGIPINANE
Molecular rearrangements in longipinane derivatives 2361

MACROCYCLIC/BICYCLIC
Binuclear macrocyclic and macrobicyclic complexes for dioxygen activation and transport 859
Synthesis of macrocyclic lactam/lactone derivatives having antimicrobial activity 2063
MACROMOLECULAR
Supercomputer simulation of small angle X-ray scattering, electron micrographs and X-ray diffraction patterns of macromolecular structures 77
MACROMOLECULES
Graphic representations (chemical formulae) of macromolecules 2469R*
MALARIA
Role of cell surface carbohydrates in malaria 2259
Alkaloids from plants of Madagascar in the treatment of drug-resistant *Plasmodium* malaria 2291
MARINE
Marine animal and terrestrial plant anticancer constituents 2271
MARINE
New natural products from terrestrial medicinal plants and marine algae 2311
MARINE
New trends of marine biotechnology development 811
MARINE FUNGUS
Chemistry of the cytotoxic principles of the marine fungus *Lignincola laevis* 2391
MARINE INVERTEBRATES
Bioactive metabolites from marine invertebrates 2223
MARINE SPONGES
Bioactive compounds from marine sponges 2227
MARSDENIA TINCTORIA
Antifertility principles from *Marsdenia tinctoria*: Pharmacological and phytochemical studies 2343
MASS SPECTROMETRY
Amide hydrogen exchange and mass spectrometry: A probe of high-order structure in proteins 89
Applications of accelerator mass spectrometry in analysis of trace isotopes and elements 305R*
MATERIALS
Material chemistry studies—their role for the development of advanced nitride materials 1629
Thermochemistry of Perovskite-related oxides with high oxidation states: Superconductors, sensors, fuel cell materials 1759
Chemical approaches to the design of oxide materials 1765
High-temperature chemistry of CVD (chemical vapor deposition) diamond growth 1773
Diamond substrate interactions and the adhesion of diamond coatings 1783
Diamond-like carbon 1789
Application of themodynamics, phase equilibria and kinetics to *in-situ* composite synthesis via ternary solid-state displacement reactions 1797
Tailored microstructures of silicon nitride ceramics 1807
Progress in the chemistry of ternary and quaternary nitrides 1815
Advanced materials for high temperature applications. New ways of elaboration 1823
MEDICINAL/MEDICINES
Bioactive phenolic compounds in traditional medicines 2263
Recent results in the search for bioactive compounds from Turkish medicinal plants 2295
New natural products from terrestrial medicinal plants and marine algae 2311
Constitutents of some Asian medicinal plants 2375
MEMBRANES
Separation and preconcentration of trace elements and their physicochemical forms in aqueous media using inert solid membranes 631R
Dynamics of lipids in synthetic membranes 851
MENZAMINE A
Studies on the total synthesis of menzamine A 2131
METABOLITES
Bioactive metabolites from marine invertebrates 2223
Microbial metabolites affecting lipid biosynthesis 2267
Secondary phytotoxic metabolites from pathogenic fungi: Structure, synthesis and activity 2299
Plant cell biotechnology for the production of secondary metabolites 2307
Biosynthesis of lactacystin, a novel microbial metabolite which induces differentiation of Neuro 2a cells, a mouse neuroblastoma cell line 2411
METAL CATIONS
Thermodynamic and electrochemical aspects of the interactions of functionalised calix(4)-arenes and metal cations in 'allosteric media' 435
METAL IONS
Steric effect on solvation and complexation of metal ions in solution 393
METALATION-CROSS COUPLING
Combined directed *ortho* metalation-cross coupling strategines. Design for natural product synthesis 2155
METALLOPORPHYRINS
Biomimetic oxygenations catalyzed by metalloporphyrins and metalloporphinoids bearing co-catalytic functions 1519
METALLOPROTEINS
X-ray structural studies of some metalloproteins 51
METHACRYLATE
Properties of ethylene-dimethylaminoethyl-methacrylate copolymers as poly(vinyl chloride) resin modifer 1405R
METHANE
Assessment of uncertainties in the projected concentrations of methane in the atmosphere 137R
METHYL (+)-NONACTATE
Stereocontrol using silicon: A synthesis of methyl (+)-nonactate 2049
MICROBES/MICROBIAL
Recognition and transport of natural and synthetic siderophores by microbes 773
Microbial metabolites affecting lipid biosynthesis 2267
MICROCALORIMETRY
A system of microcalorimeters 375
Interactions between surfactants and uncharged polymers in aqueous solution studies by microcalorimetry 527
MICROELECTRONIC
Terminology and conventions for micro-electronic ion-selective field effect transistor devices in electrochemistry 565R*
MICROEMULSIONS
Physicochemical studies of microemulsions 513
Thermodynamics of clustering of droplets in water/AOT/heptane microemulsion 521
MICROGLOBULIN
Standardised method for the estimation of β_2-microglobulin, retinol-binding protein and albumin in urine 915R
MICROSTRUCTURES
Tailored microstructures of silicon nitride ceramics 1807
MITOXANTRONE
Formation of reactive intermediates by cytochrome P-450 mediated oxidation of the anticancer drug mitoxantrone 2415

MODELLING
Self consistent low pressure RF (radiant flux) discharge modelling: Comparisons with experiments in clean and dusty plasmas 1363
MOLECULAR
Topological aspects of molecular interations in liquid mixtures of non-electrolytes 449
Molecular recognition by artificial receptors 679
Molecular recognition in neocarzinostatin complex: how does the apoprotein bind specifially and stabilize the chromophore? 791
Recent development in NMR methodology for the study of molecular structure and dynamics 1583
Perspectives in supramolecular chemistry: From molecular recognition towards self-organisation 1961
Molecular rearrangements in derivatives of grandiflorenic acid [(−)-kaur-9(11),16-dien-19-oic acid] 2357
Molecular rearrangements in longipinane derivatives 2361

N-DODECYL SULPHATE
Interaction of *Aspergillus niger* catalase with sodium *N*-dodecyl sulphate 71
NARCISSUS PSEUDONARCISSUS
Biochemical aspects of carotene desaturation and cyclization in chromoplast membranes from *Narcissus pseudonarcissus* 1047
NATURAL PRODUCTS
The invention of chemical reactions of relevance to the chemistry of natural products 1943
The study of intramolecular dynamics by nuclear magnetic resonance 1955
Perspectives in supramolecular chemistry: From molecular recognition towards self organisation 1961
Recent discoveries in the chemistry of natural products 1967
Functional roles of natural products: The involvement of extended arrays of weak interactions in cooperative binding phenomena 1975
The chemistry of some sponges and their symbionts 1983
Synthetic and stereochemical aspects of pheromone chemistry 1991
Unnatural prostaglandins of biochemical and physiological significance 1999
Enhanced synthetic efficiency towards natural products via transition metal catalyzed reactions 2007
Design and development of synthetic peptide antigens 2015
The formation of benzophenanthridine alkaloids 2023
Higher-order cycloaddition reactions in natural product synthesis 2029
Natural products by enantioselective catalysis with transition metal compounds 2033
Asymmetric syntheses and lanthanide-induced CD studies of (24R and 24S) 5β-cholestane-3α,7α,12α,24,25-pentols 2037
The tandem cycloaddition chemistry of nitro-alkenes 2041
Biosynthetic studies on taxol 2045
Stereocontrol using silicon: A synthesis of methyl (+)-nonactate 2049
Recent developments in the synthesis of drimane and lactarane sesquiterpenes 2053
Synthesis and CD spectral studies of some fused cholestenopyrimidines 2057
Synthesis of macrocyclic lactam/lactone derivatives having antimicrobial activity 2063
Enantioselective synthesis of alkaloids and carbohydrates via chemoenzymatic methods 2067
Application of the aza-Claisen rearrangement to the total synthesis of natural products: (−)-isoiridomyrmecin
Concise enantiospecific syntheses of α-hydroxy-β-amino acids and indolizidines of natural origin 2075
A new synthetic approach to dendrobatid alkaloids 2079
Synthetic studies on phenazine antibiotics and antheridic acid 2083
A palladium catalyzed route to a benzofuran analogue of idolactam V (ILV): Effects on PKC isotype selectivity 2087
The structure and reactivity of C_{60} 2091
Total syntheses of strychnos alkaloids 2095
Synthesis and chemistry of the insect anti-feedant azadirachtin 2099
Di-2-ethylhexyl phthalate: A medical concern and a possible marker for chronic fatigue syndrome 2103
Synthesis of heterocyclic natural products: Model studies towards diazonamide A 2107
Synthesis, conformational and biological properties of lipophilic derivatives of gastrin and cholecystokinin peptides 2111
Stereospecific addition to thiophenol to electron-deficient double bond and its application to natural product synthesis 2115
Enantiocontrolled route to natural products using chiral equivalents of cyclopentenone and cyclohexenone 2119
Experiments directed towards synthesis of complex glycosphingolipids: Gangliosanglioside GQ1b[1] 2123
Diastereo- and enantioselective akaloid syntheses 2127
Studies on the total synthesis of mazamine A 2131
Novel methods for the synthesis of *C*-aryl glycoside natural products 2135
Biomimetic chemical transformation from simple indole alkaloids to *Gelsemium* alkaloids 2139
Atropisomer-selective 1,1-binaphthyl synthesis via chirality transfer from sulfur 2143
Use of the aryl groups as the carboxyl synthon. Application to the synthesis of some natural products containing hydroxy amino acid functions 2151
Combined directed *ortho* metalation-cross coupling strategies. Design for natural product synthesis 2155
Asymmetric synthesis of natural products monitored by chiral sulfoxides 2159
N-acyliminium ion cyclisations in natural product chemistry: Synthesis of gelsemine 2163
Application of α-chloroglycine residues for the modification of oligopeptides 2167
Enzymatic synthesis of analogs of bacterial lipid A and design of biologically active LPS-antagonists and -mimetics 2171
Total synthesis of aryl *C*-glycoside antibiotics 2175
Azabicyclo[3.2.1]octene derivatives obtained by rearrangement reactions in course of the catharanthine synthesis 2179
The chemistry of khat. An approach to the synthesis of euonyminol 2183
Synthesis of *C*-glycosyl compounds and other natural products from levoglucosenone 2189
Highlights in phytochemistry of hepaticaebiologically active terpenoids and aromatic compounds 2193
Second genertion leukotriene biosynthesis inhibitors 2197
Discovery of potential antidepressant agents: Novel 3-arylpyrrolidines with dual mechanism of action on neurotransmission 2201
Chemistry in a salad bowl: Comparative organosulfur chemistry of garlic, onion and shiitake mushrooms 2205
The biosynthesis of pyoverdins 2207
Biorational design of herbicides: Synthesis of inhibitors of the PFP enzyme 2211
Enzyme-mediated regioselective acylation of polyhydroxylated natural products 2215
Mechanism-based isolation and structures of some anticancer active natural products 2219
Bioactive metabolites from marine invertebrates 2223
Bioactive compounds from marine sponges 2227
Search for new antifungal compounds from higher plants 2231
Structural studies on glycoprotein glycans 2235
Biomimetic synthesis of nazlinin and nitrarine 2239
Biotechnology and synthetic chemistry: Routes to clinically important natural products 2243
Structural and synthetic studies of pithomycolide 2249
Synthesis and cytotoxicity of natural (+)-ducarmycin A and its three possible stereo-isomers 2255
Role of cell surface carbohydrates in malaria 2259
Bioactive phenolic compounds in traditional medicines 2263
Microbial metabolites affecting lipid biosynthesis 2267
Marine animal and terrestrial plant anticancer constituents 2271
Recent studies on cytotoxic, anti-HIV and antimalarial agents from plants 2283
Bioactive components from *Ficus glomerata* 2287
Alkaloids from plants of Madagascar in the treatment of drug-resistant *Plasmodium* malaria 2291
Recent results in the search for bioactive compounds from Turkish medicinal plants 2295
Secondary phytotoxic metabolites from pathogenic fungi: Structure, synthesis and activity 2299
Biosynthesis of the pigments of life. The mystery of the cyclisation and ring D-inversion in the formation of uroporphyrinogen III 2303
Plant cell biotechnology for the production of secondary metabolites 2307
New natural products from terrestrial medicinal plants and marine algae 2311
The chemistry of fumonisins and related compounds. Fumonisins from *Fusarium moniliforme*: Chemistry, structure and biosynthesis 2315
Synthesis of new antitumour anthracyclines: Derivatives bearing a fluorine substitution at position 8 or 10 2319
Gas phase infrared spectroscopy in characterization of unsaturated natural products 2323
Aframodial and other bioactive diterpenoids from *Aframomum* species 2327
Total synthesis of yuehchukene 2331
Recent developments in iridoids chemistry 2335

Some recent isolation studies from potential insecticidal *Piper* species 2339
Antifertility principles from *Marsdenia tintoria:* Pharmacological and phytochemical studies 2343
Biologically active constitutents of tropical and subtropical plants 2347
Bioactive natural products from Thai plants 2353
Molecular rearrangements in derivatives of grandiflorenic acid [(−)-kaur-9(11),16-dien-19-oic acid) 2357
Molecular rearrangements in longipinane derivatives 2361
Erythromycin: New chemistry on an old compound 2365
C_{45}- and C_{50}-carotenoids 2369
Constituents of some Asian medicinal plants 2375
Cytotoxic lignans from *Haplophyllum* species 2379
Structure elucidation of xanthone derivatives with CD4-binding activity from *Penicillium glabrum* (Wehmer) Westling 2383
A transition from ionic to free-radical mechanisms in chemistry and enzymology 2387
Chemistry of the cytotoxic principles of the marine fungus *Lignincola laevis* 2391
Anthraquinones and chemotaxonomy of the asphodelaceae 2395
Multiple ionizations in proteins: Arsenical analogues of natural phosphates 2399
Anticoagulant activities of β-1,3-glucansulfates in dependence on their molecular weight 2403
Structure–activity relations of teratongenic natural products 2407
Biosynthesis of lactacystin, a novel microbial metabolite which induces differentiation of Neuro 2a cells, a mouse neuroblastoma cell line 2411
Formation of reactive intermediates by cytochrome P-450 mediated oxidation of the anticancer drug mitoxantrone 2415
NAZLININ
Biomimetic synthesis of nazlinin and nitrarine 2239
NEOCARZINOSTATIN
Molecular recognition in neocarzinostatin complex: how does the apoprotein bind specifically and stabilize the chromophore? 791
NEUROBLASTOMA
Biosynthesis of lactacystin, a novel microbial metabolite which induces differentiation of Neuro 2a cells, a mouse neuroblastoma cell line 2411
NEUROTRANSMISSION
Discovery of potential antidepressant agents: Novel 3-arylpyrrolidines with dual mechanism of action on neurotransmission 2201
NEUTRON SCATTERING
Hydrophobic interactions and small-angle neutron scattering in aqueous solutions 515
NICKEL
Measurement of total nickel in body fluids: Electrothermal atomic absorption methods and sources of preanalytic variation 357R
NITRARINE
Some recent isolation studies from potential insecticidal *Piper* species 2239
NITRIDES
Material chemistry studies—their role for the development of advances nitride materials 1629,
Tailored microstructures of silicon nitride ceramics1807
Progress in the chemistry of ternary and quaternary nitrides 1815
NITROALKENES
The tandem cycloaddition chemistry of nitroalkenes 2041
NITROGEN
Aza-closo-dodecaborane(12): The story of six-coordinate nitrogen 255
NMR
Recent development in NMR methodology for the study of molecular structure and dynamics 1583
The study of intramolecular dynamics by nuclear magnetic resonance 1955
NOMENCALTURE/TERMINOLOGY REPORTS
Nomenclature for the presentation of results of chemical analysis 595R*
Recommendations for nomenclature in laboratory robotics and automation 609R*
Structure-based nomenclature for irregular single-strand organic polymers 873R*
Glossary of terms used in physical organic chemistry 1077R*
Recommendations for nomenclature and tables in biochemical thermodynamics 1641R*
Thin films including layers: terminology in relation to their preparation and characterization 1667R*
Recommendations for the characterization of porous solids 1739R*
Impedances of electrochemical systems: Terminology, nomenclature and representation—Part I: Cells with metal electrodes and liquid solutions 1831R*
Nomenclature and terminology of graphite intercalation compounds 1893R*
Nomenclature of interlaboratory analytical studies 1903R*
Names and symbols of transfermium elements 2419R*
Graphic representations (chemical formulae) of macromolecules 2469R*
Basic classification and definitions of polymerization reactions 2483R*
Nomenclature of thermometric and enthalpimetric methods in chemical analysis 2487R*
Classification and definition of analytical methods based on flowing media 2493R*
Nomenclature for radioanalytical chemistry 2513R*
Recommendations for nomenclature of ion-selective electrodes 2527R*
Glossary of bioanalytical nomenclature—Part I: General terminology, body fluids, enzymology, immunology 2587R*
NUCLEASE
Simple but efficient models for nuclease catalysis 687
NUCLEIC ACIDS
Interactions between expanded porphyrins and nucleic acids 845

OLIGOPEPTIDES
Application of α-chloroglycine residues for the odification of oligopeptides 2167
ONCOLOGY
Retinoids in oncology: Experimental and clinical aspects 995
ONION
Chemistry in a salad bowl: Comparative organosulfur chemistry of garlic, onion and shiitake mushrooms 2205
ORGANIC
Analytical techniques for trace organic compounds—VI. Application of liquid chromatography–mass spectrometry 1913R
ORGANIC SYNTHESIS
Tricarbonyliron lactone complexes in organic synthesis 1415
Application of intramolecular Heck reactions for forming congested quaternary carbon centers in complex molecule total synthesis 1423
An approach to stable organic molecules of the triplet state via organosilicon route 1431
Site selective hydrogen/metal exchange: Competition and cooperation between superbases and neighboring groups 1439
Recent advances in the chemistry and applications of high oxidation state alkylidene complexes 1447
Asymmetric catalysis with chiral organo-copper–copper arenethiolates 1455
Controlling stereochemistry in C–C and C–H bond formation with electronically asymmetric organometallics and chiral poisons 1463
Palladium-catalyzed cross-coupling reaction of organometalloids through activation with fluoride ion 1471
Enantioselective synthesis via sparteine-induced asymmetric deprotonation 1479
Asymmetric synthesis mediated by chiral ligands 1487
New synthetic methods based on organo-zirconium and organocopper chemistry 1493
Construction of α-alkylidene-γ-butyrolactones from acyclic ester precursors 1501
Organometallic chemistry in industrial vitamin A and vitamin E synthesis 1509
Biomimetic oxygenations catalyzed by metalloporphyrins and metalloporphinoids bearing co-catalytic functions 1519
Catalytic C–H/olefin coupling 1527
Electronic effects in asymmetric catalysis: Enantioselective carbon–carbon bond forming processes 1535
Transition metals as assembling and templating species: From catenanes and knots to strings threaded through molecular rings 1543
A practical asymmetric synthesis of LTD_4 antagonist 1551
Novel Lewis acid catalysis in organic synthesis 1557
Sulfoxides and stereochemical control in organometallic chemistry 1565
ORGANOBORANES
Some chemistry of hindered organoboranes 223
ORGANOBORON
New synthetic transformations via organoboron compounds 213
ORGANOCOPPER
New synthetic methods based on organozirconium and organocopper chemistry 1493
ORGANOMETALLIC
Tricarbonyliron lactone complexes in organic synthesis 1415
Application of intramolecular Heck reactions for forming congested quaternary carbon centers in complex molecule total synthesis 1423
An approach to stable organic molecules of the triplet state via organosilicon route 1431

Site selective hydrogen/metal exchange: Competition and cooperation between superbases and neighboring groups 1439
Recent advances in the chemistry and applications of high oxidation state alkylidene complexes 1447
Asymmetric catalysis with chiral organo-copper–copper arenethiolates 1455
Controlling stereochemistry in C–C and C–H bond formation with electronically asymmetric organometallics and chiral poisons 1463
Palladium-catalyzed cross-coupling reaction of organometalloids through activation with fluoride ion 1471
Enantioselective synthesis via sparteine-induced asymmetric deprotonation 1479
Asymmetric synthesis mediated by chiral ligands 1487
New synthetic methods based on organo-zirconium and organocopper chemistry 1493
Construction of α-alkylidene-γ-butyrolactones from acyclic ester precursors 1501
Organometallic chemistry in industrial vitamin A and vitamin E synthesis 1509
Biomimetic oxygenations catalyzed by metalloporphyrins and metalloporphinoids bearing co-catalytic functions 1519
Catalytic C–H/olefin coupling 1527
Electronic effects in asymmetric catalysis: Enantioselective carbon–carbon bond forming processes 1535
Transition metals as assembling and templating species: From catenanes and knots to strings threaded through molecular rings 1543
A practical asymmetric synthesis of LTD_4 antagonist 1551
Novel Lewis acid catalysis in organic synthesis 1557
Sulfoxides and stereochemical control in organometallic chemistry 1565

ORGANOMETALLOIDS
Palladium-catalyzed cross-coupling reaction of organometalloids through activation with fluoride ion 1471

ORGANOSILICON
An approach to stable organic molecules of the triplet state via organosilicon route 1431

ORGANOSULFUR CHEMISTRY
Chemistry in a salad bowl: Comparative organosulfur chemistry of garlic, onion and shiitake mushrooms 2205

ORGANOZIRCONIUM
New synthetic methods based on organozirconium and organocopper chemistry 1493

ORIENTATIONAL ORDER
Thermodynamics of binary mixtures of alkylbenzenes: Role of orientational order in benzene + alkylbenzene mixtures 399

OSCILLATOR
Salt-water oscillator and its non-electrolyte analogues 455

OSMIUM
Borane–osmium cluster chemistry 263

OSMOTIC
A thermodynamic framework for solutions based on the osmotic equilibrium concept—1: General formulation 383

OXIDE
Chemical approaches to the design of oxide materials 1765

OXYGEN
Reporting of stable hydrogen, carbon, and oxygen isotopic abundances 273R

PALLADIUM CATALYZED
Palladium-catalyzed cross-coupling reaction or organometalloids through activation with fluoride ion 1471
Tailored microstructures of silicon nitride ceramics 2087

PARAMETERS
Symbols for fine and hyperfine structure parameters 571R
Compilation and critical evaluation of structure-reactivity parameters and equations—Part I: Values of σ_m and σ_p based on the ionization of substituted benzoic acids in water at 25°C 2451R

PENICILLIUM GLABRUM
Structure elucidation of xanthone derivatives with CD4-binding activity from *Penicillium glabrum* 2383

PEPTIDES
Partial molar heat capacities volumes and compressibilities of aqueous solutions of some peptides tht model side-chains of proteins 387
Design and development of synthetic peptide antigens 2015
Synthesis, conformational and biological properties of lipophilic derivatives of gastrin and cholecystokinin peptides 2111

PESTICIDE
Pesticides report 31: Effects of storage and processing on pesticide residues in plant products 335R

pH
Recommendations for the electrometric determination of the pH of atmospheric wet deposition 649R

PHASE EQUILIBRIA
Application of thermodynamics, phase equilibria and kinetics to *in-situ* composite synthesis via ternary solid-state displacement reactions 1797

PHASE TRANSITIONS
Definitions of terms relating to phase transitions of the solid state 577R*

PHASES
Standard quantities in chemical thermodynamics. Fugacities, activities and equilibrium constants for pure and mixed phases 533R*

PHENAZINE ANTIBIOTICS
Synthetic studies on phenazine antibiotics and antheridic acid 2083

PHENOLIC
Synthesis of macrocyclic lactam/lactone derivatives having antimicrobial activity 2263

PHEROMONE
Synthetic and stereochemical aspects of pheromone chemistry 1991

PHILANTHOTOXIN
Bioorganic studies of transmitter receptors with philanthotoxin analogs 671

PHOSPHOLIPASE
Darwinian evolution of *Trimeresurus flavoviridis* venom gland phospholipase A_2 isozymes 715

PHOTOSYNTHETIC
Binuclear macrocyclic and macrobicyclic complexes for dioxygen activation and transport 859

PHYSICAL ORGANIC CHEMISTRY
Glossary of terms used in physical organic chemistry 1077R*

PHYSICOCHEMICAL
Physicochemical studies of microemulsions 513

PHYTOCHEMISTRY
Highlights in phytochemistry of hepaticaebiologically active terpenoids and aromatic compounds 2193

PHYTOTOXIC
Secondary phytotoxic metabolites from pathogenic fungi: Structure, synthesis and activity 2299

PIGMENTS
Biosynthesis of the pigments of life. The mystery of the cyclisation and ring D-inversion in the formation of uroporphyrinogen III 2303

PIPER
Some recent isolation studies from potential insecticidal *Piper* species 2339

PITHOMYCOLIDE
Structural and synthetic studies of pithomycolide 2249

PLANTS
Pesticides report 31: Effects of storage and processing on pesticide residues in plant products 335R
Search for new antifungal compounds from higher plants 2231
Recent studies on cytotoxic, anti-HIV and antimalarial agents from plants 2283
Recent results in the search for bioactive compounds from Turkish medicinal plants 2295
Plant cell biotechnology for the production of secondary metabolites 2307
New natural products from terrestrial medicinal plants and marine algae 2311
Biologically active constituents of tropical and subtropical plants 2347
Bioactive natural products from Thai plants 2353
Constituents of some Asian medicinal plants 2375

PLASMA
The chemistry of etching and deposition processes 1185
Mass and optical emission spectroscopy of plasmas for diamond synthesis 1195
Atoms, radicals and ions observed in plasmas—Their gas and surface chemistry 1207
Review of plasma development in the former Soviet Union 1215
The future of thermal plasma processing for coating 1223
Plasma fluidized and spouted bed reactors: An overview 1231
High temperature processing and numerical modelling of thermal plasmas in Norway 1239
Plasma spraying: Present and future 1247
Diagnostic techniques for plasma reactor temperature and species determination in advanced materials processing 1259
Theoretical basis of non-equilibrium near atmospheric pressure plasma chemistry 1267
Modelling of dielectric barrier discharge chemistry 1275
Theory of electric corona including the role of plasma chemistry 1287
High power plasma arc melting process for incinerated ash contraction 1295
Gliding arc: Applications to engineering and environment control 1301
The reactive sputtering of oxides and nitrides 1311

Nucleation, growth, and morphology of dust in plasmas 1319
Electron cyclotron resonance plasma etching of Si with Cl_2: Plasma chemistry and mechanisms 1327
Plasma processing techniques used at Caswell 1335
Processing of electronic materials by microwave plasma 1343
Decomposition of gaseous dielectrics (CF_4, SF_6) by a non-equilibrium plasma. Mechanisms, kinetics, mass spectrometric studies and interactions with polymeric targets 1353
Self consistent low pressure RF (radiant flux) discharge modelling: Comparisons with experiments in clean and dusty plasmas 1363
Plasma and surface diagnostics in PECVD (plasma-enhanced chemical vapor deposition) from silicon containing organic monomers 1373
Real-time monitoring of surface chemistry during plasma processing 1381
The fullerenes: Precursors for 21st century materials 1389
Plasmaphysical and plasmachemical aspects of diamond deposition in low pressure plasmas 1397
PLASMODIUM
Alkaloids from plants of Madagascar in the treatment of drug-resistant *Plasmodium* malaria 2291
POLYMERIZATION REACTIONS
Basic classification and definitions of polymerization reactions 2483R*
POLYMERS
Interactions between surfactants and uncharged polymers in aqueous solution studied by microcalorimetry 527
Structure-based nomenclature for irregular single-strand organic polymers 873R*
POLYPEPTIDE
Polypeptide growth factors: Structure, function and mechanism of action 9
POLYSACCHARIDE
Thermodynamics of polysaccharide polyelectrolytes: Enthalpy changes in the conformational transition of κ-carrageenan 461
POROUS SOLIDS
Recommendations for the characterization of porous solids 1739R*
PORPHYRINS
Intermolecular interaction between multifunctional porphyrin and ubiquinone analogues 797
Towards synthetic enzymes based on porphyrins and steroids 803
Interactions between expanded porphyrins and nucleic acids 845
PRESSURE
Life in the pressure cooker: The thermal unfolding of proteins from hyperthermophiles 485
PROLINE
Case study of protein structure, stability, and function: NMR investigations of the proline residues in staphylococcal nuclease 65
PROSTAGLANDINS
Unnatural prostaglandins of biochemical and physiological significance 1999
PROTEINASE
Invertebrate proteinase inhibitors 1
PROTEINS
Invertebrate proteinase inhibitors 1
Polypeptide growth factors: Structure, function and mechanism of action 9
Targeting enzyme sites in pyruvate kinase, glutamate dehydrogenase and glutathione S-transferase 15
Structural biology of high molecular weight kininogen 27
Structure and function of related proton channel-forming proteins 35
Comparative modelling of human renin: A retrospective evaluation of the model with respect to the X-ray crystal structure 43
X-ray structural studies of some metalloproteins 51
Structure-function relationship of trichosanthin 57
Case study of protein structure, stability, and function: NMR investigations of the proline residues in staphylococcal nuclease 65
Interaction of *Aspergillus niger* catalase with sodium *N*-Dodecyl sulphate 71
Supercomputer simulation of small angle X-ray scattering, electron micrographs and X-ray diffraction patterns of macromolecular structures 77
Conformational equilibrium of dihydronicotin amide in LDH–NADH 83
Amide hydrogen exchange and mass spectrometry: A probe of high-order structure in proteins 89
Post translational modification of crystallins isolated from human lenses 95
HIV-transmembrane glycoprotein GP41 ENV fragments with high antigenicity and their application to determine HIV-positive sera 101
Structural analysis of proteins in Thailand: Identification of abnormal hemoglobins 105
Cataractous lens and its environment 111
Partial molar heat capacities volumes and compressibilities of aqueous solutions of some peptides that model side-chains of proteins 387
Life in the pressure cooker: The thermal unfolding of proteins from hyperthermophiles 485
Protein adsorption at solid surfaces: A thermodynamic approach 491
Standardised method for the estimation of β_2-microglobulin, retinol-binding protein and albumin in urine 915R
Multiple ionizations in proteins: Arsenical analogues of natural phosphates 2399
PSOPHOCARPUS TETRAGONOLOBUS
Thermodynamics of lectin–sugar interaction: Binding of sugars to winged bean (*Psophocarpus tetragonolobus*) basic aglutinin (WBAI) 497
PYOVERDINS
The biosynthesis of pyoverdins 2207

QUINOPROTEIN
Enantioselective conversions by bacterial quinoprotein alcohol dehydrogenases 745
Modeling of quinoprotein functions 753

RADIOACTIVITY
Determination of very low levels of radioactivity 2537R*
RADIOANALYTICAL
Nomenclature for radioanalytical chemistry 2513R*
REACTION MECHANISMS
Terminology and notations for multistep electrochemical reaction mechanisms 2445R
REACTORS
Plasma fluidized and spouted bed reactors: An overview 1231
RECEPTORS
Molecular recognition by artificial receptors 679
REGIOSELECTIVE
Enzyme-mediated regioselective acylation of polyhyroxylated natural products 2215
RENIN
Comparative modeling of human renin: A retrospective evaluation of the model with respect to the X-ray crystal structure 43
RESIN
Properties of ethylene-dimethylaminoethyl-methacrylate copolymers as poly(vinyl chloride) resin modifier 1405R
RETINOIDS
Recent progress in carotenoid and retinoid synthesis 939
Isomerization reactions of retinoids in the visual system 989
Retinoids in oncology: Experimental and clinical aspects 995
RHODOPSINS
Rhodopsins containing 6- to 9-membered rings. The triggering process of visual transduction 981
RIBONUCLEASE A
Thermodynamics of denaturation of ribonuclease A in aqueous amino acid solutions 473
ROBOTICS
Recommendations for nomenclature in laboratory robotics and automation 609R

SALAD BOWL
Chemistry in a salad bowl: Comparative organosulfur chemistry of garlic, onion and shiitake mushrooms 2205
SESQUITERPENES
Recent developments in the synthesis of drimane and lactarane sesquiterpenes 2053
SHIITAKE MUSHROOMS
Chemistry in a salad bowl: Comparative organosulfur chemistry of garlic, onion and shiitake mushrooms 2205
SIDEROPHORES
Recognition and transport of natural and synthetic siderophores by microbes 773
SILICA-BONDED PHASES
Analyte isolation by solid phase extraction (SPE) on silica-bonded phases: Classification and recommended practices 277R
SIX-COORDINATE NITROGEN
Aza-closo-dodecaborane(12): The story of six-coordinate nitrogen 255
SOLID MEMBRANES
Separation and preconcentration of trace elements and their physicochemical forms in aqueous media using inert solid membranes 631R

SOLID PHASE
Analyte isolation by solid phase extraction (SPE) on silica-bonded phases: Classification and recommended practices 277R
SOLID STATE
Definitions of terms relating to phase transitions of the solid state 577R*
SOLUTE
Interactions in solutions: The interplay between solute solvation and solute–solute interactions 429
SPECTROMETRY
Applications of accelerator mass spectrometry in analysis of trace isotopes and elements 305R
SPIDER
Spider neurotoxins and their neuronal receptors 783
SPONGES
Bioactive substances isolated from marine sponge, a miniature conglomerate of various organisms 819
The chemistry of some sponges and their symbionts 1983
Bioactive compounds from marine sponges 2227
SPUTTERING
The reactive sputtering of oxides and nitrides 1311
STAPHYLOCOCCAL
Case study of protein structure, stability, and function: NMR investigations of the proline residues in staphylococcal nuclease 65
STATISTICAL
Some recent developments in the statistical mechanical theory of ionic solvation 405
STEREO-CHEMICAL/-CONTROL,-SPECIFIC
Steric effect on solvation and complexation of metal ions in solution 393
Controlling stereochemistry in C–C and C–H bond formation with electronically asymmetric organometallics and chiral poisons 1463
Sulfoxides and stereochemical control in organometallic chemistry 1565
Stereocontrol using silicon: A synthesis of methyl (+)-nonactate 2049
Stereospecific addition of thiophenol to electron-deficient double bond and its application to natural product synthesis 2115
STEROIDS
Towards synthetic enzymes based on porphyrins and steroids 803
STRUCTURE–ACTIVITY RELATIONSHIPS
Structure-activity relationships for biodegradation: A critical review 1931R
STRUCTURE–REACTIVITY PARAMETERS
Compilation and critical evaluation of structure-reactivity parameters and equations—Part I: Values of σ_m and σ_p based on the ionization of substituted benzoic acids in water at 25°C 2451R
STRYCHNOS ALKALOIDS
Total syntheses of strychnos alkaloids 2095
SUGARS
Thermodynamics of lectin–sugar interaction: Binding of sugars to winged bean (*Psophocarpus tetragonolobus*) basic agglutinin (WBAI) 497
SULFOXIDES
Sulfoxides and stereochemical control in organometallic chemistry 1565
SUPERBASES
Site selective hydrogen/metal exchange: Competition and cooperation between superbases and neighboring groups 1439
SUPRAMOLECULAR
Perspectives in supramolecular chemistry: From molecular recognition towards self-organisation 1961
SURFACTANTS
Interactions between surfactants and uncharged polymers in aqueous solutions 527
SYMBIONTS
The chemistry of some sponges and their symbionts 1983
SYNTHESIS
Recent advances in the boron route to asymmetric synthesis 201
Application of intramolecular Heck reactions for forming congested quaternary carbon centers in complex molecule total synthesis 1423
Enantioselective synthesis via sparteine-induced asymmetric deprotonation 1479
A practical asymmetric synthesis of LTD_4 antagonist 1551
Application of themodynamics, phase equilibria and kinetics to *in-situ* composite synthesis via ternary solid-state displacement reactions 1797
SYNTHETIC
New synthetic transformations via organoboron compounds 213
SYNTHON
Use of the aryl groups as the carboxyl synthon. Application to the synthesis of some natural products containing hydroxy amino acid functions 2151

TAILORED MICROSTRUCTURES
Tailored microstructures of silicon nitride ceramics 1807
TAXOL
Biosynthetic studies on taxol 2045
TERATOGENIC
Structure–activity relations of teratogenic natural products 2407
TERPENOIDS
Highlights in phytochemistry of hepaticaebiologically active terpenoids and aromatic compounds 2193
THAI PLANTS
Bioactive natural products from Thai plants 2353
THERMOCHEMISTRY
Thermochemistry of alkylated uracils in aqueous solutions. Enthalpies of hydration of 3-alkyluracils 503
THERMODYNAMICS
Thermodynamics of aqueous solutions (Inaugural address) 373
A system of microcalorimeters 375
A thermodynamic framework for solutions based on the osmotic equilibrium concept—1: General formulation 383
Partial molar heat capacities volumes and compressibilities of aqueous solutions of some peptides that model side-chains of proteins 387
Steric effect on solvation and complexation of metal ions in solution 393
Thermodynamics of binary mixtures of alkyl-benzenes: role of orientational order in benzene + alkylbenzene mixtures 399
Some recent developments in the statistical mechanical theory of ionic solvation 405
Transfer entropies and structuredness of solvents 411
Volume changes in complex formation between crown ethers of cryptand-222 and alkali metals in various solvents 419
Interactions in solutions: The interplay between solute solvation and solute-solute interactions 429
Thermodynamic and electrochemical aspects of the interactions of functionalised calix(4)-arenes and metal cations in 'allosteric media' 435
Thermodynamics of eutectic mixtures. Addition compounds and associated mixtures 441
Topological aspects of molecular interactions in liquid mixtures of non-electrolytes 449
Salt-water oscillator and its non-electrolyte analogues 455
Thermodynamics of polysaccharide polyelectrolytes:P Enthalpy changes in the conformational transition of κ-carrageenan 461
Temperature and guanidine induced unfolding of dodecameric glutamine synthetase from *E. coli* 469
Thermodynamics of denaturation of ribonuclease A in aqueous amino acid solutions 473
Studies of enthalpy balance and adenosine triphosphate turnover in cultured animal cells 479
Life in the pressure cooker: The termal unfolding of proteins from hyperthermophiles 485
Protein adsorption at solid surfaces: A thermodynamic approach 491
Thermodynamics of lectin–sugar interaction: Binding of sugars to winged bean (*Psopho-carpus tetragonolobus)* basic agglutinin (WBAI) 497
Thermochemistry of alkylated uracils in aqueous solutions. Enthalpies of hydrations of 3-alkyluracils 503
Physicochemical studies of microemulsions 513
Hydrophobic interactions and small-angle neutron scattering in aqueous solutions 515
Thermodynamics of clustering of droplets in water/AOT/heptane microemulsion 521
Interactions between surfactants and uncharged polymers in aqueous solution studied by microcalorimetry 527
Recommendations for nomenclature and tables in biochemical thermodynamics 1641R
Application of thermodynamics, phase equilibria and kinetics to *in-situ* composite synthesis via ternary solid-state displacement reactions 1797
THERMOMETRIC
Nomenclature of thermometric and enthalpimetric methods in chemical analysis 2487R*
THIN FILMS
Thin films including layers: terminology in relation to their preparation and characterization 1667R*

THIOPHENOL
Stereospecific addition of thiophenol to electron-deficient double bond and its application to natural product synthesis 2115
TOPOLOGICAL
Topological aspects of molecular interactions in liquid mixtures of non-electrolytes 449
TRACE
Analytical techniques for trace organic compounds—VI. Application of liquid chromatography–mass spectrometry 1913R
TRACE ELEMENTS
Separation and preconcentration of trace elements and their physicochemical forms in aqueous media using inert solid membranes 631R
TRANSFERMIUM ELEMENTS
Names and symbols of transfermium elements 2419R*
TRANSITION METALS
Transition metals as assembling and templating species: From catenanes and knots to strings threaded through molecular rings 1543
Enhanced synthetic efficiency towards natural products via transition metal catalyzed reactions 2007
Natural products by enantioselective catalysis with transition metal compounds 2033
TRANSMITTER
Bioorganic studies of transmitter receptors with philanthotoxin analogs 671
TRICARBONYLIRON
Tricarbonyliron lactone complexes in organic synthesis 1415
TRICHOSANTHIN
Structure–function relationship of trichosanthin 57
TRIGLYCERIDES
New concepts for studying and understanding the aggregation, co-aggregation, de-aggregation and self-coiling of organic molecules. Why are cholesterols and triglycerides culprits of arteriosclerosis? 1621
TRIMERESURUS FLAVOVIRIDS
Darwinian evolution of *Trimeresurus flavoviridis* venom gland phospholipase A_2 isozymes *715*
UBIQUINONE
Intermolecular interaction between multifunctional porphyrin and ubiquinone analogues 797
URACILS
Thermochemistry of alkylated uracils in aqueous solutions. Enthalpies of hydration of 3-alkyluracils 503
URINE
Standardised method for the estimation of β_2-microglobulin, retinol-binding protein and albumin in urine 915R
UROPORPHYRINOGEN III
Biosynthesis of the pigments of life. The mystery of the cyclisation and ring D-inversion in the formation of uroporphyrinogen III 2303

VITAMIN
Organometallic chemistry in industrial vitamin A and vitamin E synthesis 1509

WEAK INTERACTIONS
Functional roles of natural products: The involvement of extended arrays of weak interactions in cooperative binding phenomena 1975
WET DEPOSITION
Recommendations for the electrometric determination of the pH of atmospheric wet deposition (acid rain) 649R

X-RAY SCATTERING
Supercomputer simulation of small angle X-ray scattering, electron micrographs and X-ray diffraction patterns of macromolecular structures 77
XANTHONE
Structure elucidation of xanthone derivatives with CD4-binding activity from *Penicillium glabrum* (Wehmer) Westling 2383

YUEHCHUKENE
Total synthesis of yuehchukene 2331
